8	Spartanburg	18	Kershaw	28	Darlington	38	Fairfield		
9	Berkeley	19	Greenwood	29	Clarendon	39	Marion		
10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

BAMBERG COUNTY

South Carolina County Rankings

All 46 counties are ranked from first (1) to last (46). In addition to the overall ranking, each county has a domain and indicator ranking.

1	York	11	Oconee	21	Newberry	31	Jasper	41	Barnwell
2	Pickens	12	Horry	22	Saluda	32	Hampton	42	Lee
3	Lexington	13	Charleston	23	Sumter	33	Chester	43	Dillon
4	Greenville	14	Richland	24	Edgefield	34	Laurens	44	Williamsburg
5	Dorchester	15	Aiken	25	Georgetown	35	Bamberg	45	Allendale
6	Beaufort	16	Abbeville	26	Florence	36	Union	46	McCormick
7	Lancaster	17	Calhoun	27	Colleton	37	Orangeburg		
8	Spartanburg	18	Kershaw	28	Darlington	38	Fairfield		
9	Berkeley	19	Greenwood	29	Clarendon	39	Marion		
10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

9	Berkeley	19	Greenwood	29	Clarendon	39	Marion		
10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

9	Berkeley	19	Greenwood	29	Clarendon	39	Marion		
10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

8	Spartanburg	18	Kershaw	28	Darlington	38	Fairfield		
9	Berkeley	19	Greenwood	29	Clarendon	39	Marion		
10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

Lower county rankings (e.g. #1) indicates better outcomes. There are 46 counties in South Carolina. The data source for each indicator can be found at datacenter.kidscount.org/data#SC. N.A. = Not Available.

1. This year's data is not comparable to last year's per South Carolina Department of Education. See definitions and sources on KIDS COUNT data center.

LANCASTER COUNTY

South Carolina County Rankings

All 46 counties are ranked from first (1) to last (46). In addition to the overall ranking, each county has a domain and indicator ranking.

1	York	11	Oconee	21	Newberry	31	Jasper	41	Barnwell
2	Pickens	12	Horry	22	Saluda	32	Hampton	42	Lee
3	Lexington	13	Charleston	23	Sumter	33	Chester	43	Dillon
4	Greenville	14	Richland	24	Edgefield	34	Laurens	44	Williamsburg
5	Dorchester	15	Aiken	25	Georgetown	35	Bamberg	45	Allendale
6	Beaufort	16	Abbeville	26	Florence	36	Union	46	McCormick
7	Lancaster	17	Calhoun	27	Colleton	37	Orangeburg		
8	Spartanburg	18	Kershaw	28	Darlington	38	Fairfield		
9	Berkeley	19	Greenwood	29	Clarendon	39	Marion		
10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

9	Berkeley	19	Greenwood	29	Clarendon	39	Marion		
10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.

10	Anderson	20	Cherokee	30	Chesterfield	40	Marlboro		

Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.
