Why is this important?

Children’s Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in the state.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the S.C. Revenue and Fiscal Affairs Office, is modeled after the AECF’s KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

Questions?

Children’s Trust regularly dedicates time and energy to helping agencies understand data and collaborate with their communities to make meaningful decisions. If you would like to host a conversation about this data in your community, please contact Sarah Knox at sknox@scchildren.org.
