

Overview

In order to continue the important work of sharing ACEs with local communities, ACE Interface has granted permission to offer online ACE Training and Train-the-Trainer events. This document covers what will be offered in place of in-person events for the duration of the COVID-19 pandemic.

Six Hour – Train-the-Trainer

Two three-hour days or six hours total will replace the typical 2.5 days of training. Topics covered will include a quick introduction to each of the primary topic areas of neuroscience, epigenetics, the ACE study, and Resilience. Additional SC context will be discussed including SC ACE data, Empower Action Model and trainer infrastructure.

Three Hour – Practice Session

In-person ACE train-the-trainer includes a practice session at the end of day two to give folks an opportunity to test out their newly learned information. We will schedule a separate time no more than two months after initial training to allow for attendees to learn and practice their material. At this session attendees will present a section of the presentation as a group.

Three Hour – Technical Assistance/Follow-up

A final three-hour technical assistance and follow-up training will be offered based on topics trainers would like to spend more time exploring. After this session trainers will need to complete the agreed upon number of trainings to become an official “master trainer” and will then join the training network available to all master trainers.

System Requirements and Materials

Children’s Trust preferred webinar provided is Zoom. Please check here for system requirements: <https://support.zoom.us/hc/en-us/articles/201362023-System-requirements-for-Windows-macOS-and-Linux>

All attendees will need a Microsoft account or other arrangements will need to be made with the host site for document sharing. Materials are available for purchase and can be included in the quote. Materials include a complete ACE Interface facilitator binder and initial supplies for the Brain Architecture Game. Shipping charges apply or host sites will need to make plans for other logistics.

Pricing

Pricing is subject to change if any modifications are made to the training as described above.

Training Cost: \$450
