Lower county rankings (e.g. #1) indicates better outcomes. There are 46 counties in South Carolina. The data source for each indicator can be found at [datacenter.kidscount.org/data#SC](https://datacenter.kidscount.org/data#SC). N.A. = Not Available.

1. This year's data is not comparable to last year's per South Carolina Department of Education. See definitions and sources on KIDS COUNT data center.

### Why is this important?

Children's Trust of South Carolina produces the child well-being profiles for each county in South Carolina. They provide us with a snapshot into the status of children and families in South Carolina.

When children thrive, they meet educational milestones, live in economically stable homes and in supportive communities, and they are more likely to grow into productive, contributing members of our state.

However, as the profiles show, too many of South Carolina's children live in environments that may put them at risk for negative outcomes, including child abuse and neglect.

### How to use them?

These child well-being profiles can be used in a wide variety of ways: grant writing, community and coalition meetings, decision-making, policy and advocacy.

### Where does this data come from?

This work, done in partnership with the Annie E. Casey Foundation (AECF) and the South Carolina Revenue and Fiscal Affairs Office, is modeled after the AECF's KIDS COUNT state and national profiles.

When county-level data are available, the profiles use the same indicators as KIDS COUNT. When county-level data are not available, the profiles use proxies for the KIDS COUNT indicators.

The 2020 child well-being county profiles reflect data that was collected in 2018. These profiles DO NOT share current data on the impacts of COVID-19 on child well-being in South Carolina.
